Neurons Away

A celebration of human ingenuity and
a gateway to the furthest reaches of the imagination

YOUR MAGICAL MIND - WORKSHOP

Students will dive deep into a realm of imagination and learn how resourceful thinking can shape their reality.

A 1-hour interactive session in which students are presented with unique questions prompts and activities that allow them to gain a better understanding of who they are, how they interact with their environment and build upon their own capabilities.

Additional Information:

- *Best for ages 6 - 12*
- *Can schedule up to 4 sessions a day*
- *Each student receives a copy of "Fill in the Space"*
- *$15 per student (15-30 students per session)*

FILL IN THE SPACE is a kind of book that exercises your mind in unusual ways. While most books tell you things, this is a book that asks you things. It presents to you partial illustrations and prompts you with simple dilemmas you've never thought to confront before.

MEET THE MAKER

Sally Safadi is an author, entrepreneur, and workshop facilitator. After graduating from SUNY ESF with a degree in Biology, Sally Safadi merged her fascination with human behavior and her admiration for imagination to create Neurons Away. Sally works with hospitals, schools and various organizations to integrate new ways of thinking and creativity into everyday lifestyles and choices.
